

Whang Shih Ee

✉ sew78@cam.ac.uk | 🏠 [Website](#) | 🌐 [WhangShihEe](#) | in [Shih Ee](#)

EDUCATION

University of Cambridge

Cambridge, UK
Oct. 2024 – Jun. 2028

*First class honors (Year 1 and 2), Top 4% of cohort (14th/332)
Master of Engineering (Information engineering)*

NUS High School of Maths and Science

Singapore
Jan. 2016 – Dec. 2021

4.9/5.0 GPA, Top 5% of cohort (Principal's list)

PROJECTS

Towards Understanding LLM generalization through fine-tuning

Cambridge, UK
Feb. 2026 – May 2026

- First author on an ICML workshop paper ([Paper](#), [Github](#))
- Conducted alignment research on LLM fine-tuning under SPAR, taking ownership of literature review, experimental decisions, and result analysis.
- Designed and ran experiments using SFT pipelines; visualized and interpreted results, creating written research outputs

Alignment Research Bootcamp Oxford

Oxford, UK
Jan 2025

- Selective technical bootcamp based on ARENA syllabus covering transformers, RL and mechanistic interpretability.

AWARDS

Asian Physics Olympiad 2021 (Silver)

May 2021

Placed 33rd globally and 2nd in Singapore

Singapore Physics Olympiad 2020 (Gold)

Nov. 2020

Placed top 28 nationally

EXPERIENCE

Singapore AI Safety Institute*, Infocom Media Development Authority (IMDA)

Singapore
Aug. 2026 – Sept. 2026

Research Intern

- Built an Inspect evaluation measuring the cyber-offensive capabilities of multi-agent swarms against Android apps
- Briefed government stakeholders on key findings from AI loss-of-control incidents from summer of 2026
- *Worked in IMDA's Advanced Intelligent Software Systems (AISS) team, which collaborates closely with the Singapore AI Safety Institute

Fabrica.AI

Singapore
Jul. 2025 – Sept. 2025

Software Engineering Intern

- Worked in a team developing automated robots for construction.
- Developed and deployed in Dockerized ROS 2 environments, managing version control and parameters across development, testing, and live production.
- Improved the mapping system by integrating a new LiDAR, reducing redundancy while increasing range and reliability.

Defense Science and Technology Agency (DSTA)

Singapore
Apr. 2024 – Sept. 2024

Engineering Intern

- Developed drone countermeasures as part of a team.
- Proposed and implemented an alternative video transmission method, improving frame rate by 30% and reducing bandwidth usage by 75%.
- Transitioned the network architecture from a 1.2 kg router to a 0.14 kg transmitter and produced detailed documentation.

DSO National Laboratories

Singapore
Jan. 2024 - Mar 2024

Research Intern

- Investigated methods to generate unit vector embeddings from small datasets. ([Github](#))
- Applied tools like Lagrange multipliers and nearest-correlation matrices for numerical solutions.
- Built a Python codebase using NumPy with unit tests and documentation, ensuring reproducibility and clarity.

EXTRACURRICULAR ACTIVITIES

Cambridge University AI Safety Hub (CAISH) Alignment Desk and Fellowship

Cambridge, UK
Oct. 2024 – Dec 2025

- Scoped, researched and produced 2 written posts about AI safety evaluations as part of the CAISH Alignment Desk
- Took part in the CAISH alignment fellowship, a 6-week intensive reading group and workshop series discussing state-of-the-art AI safety research.

Cambridge University Malaysian and Singapore Society

Cambridge, UK
Apr. 2025 – Mar 2026

- Planned and executed multiple events per term for audiences of 50-200 attendees
- Coordinated event logistics and secured funding in collaboration with team members.

SKILLS

Programming Languages: Python, Java, C++

Development Tools: Linux, Git, Docker, Gradle, Conda
